Summary

Cloud Developer with a strong background in cloud solutions and web development. After starting as a freelancer, I gained expertise in React, Next.js, JavaScript, TypeScript, Docker, Kubernetes, DevOps. Currently, I work at LTIMindtree, where I focus on designing and implementing scalable cloud infrastructure. I am passionate about open-source contributions and enjoy creating personal projects to explore and innovate with new technologies.

Experience

LTIMindtree   Mar 2024 to Present

Cloud Engineer   Hyderabad, India

- Working on a Microsoft Azure Cloud project with a focus on Infrastructure as a Service (IaaS), optimizing and managing cloud infrastructure.
- Implementing and deploying scalable, secure, and efficient cloud solutions on Azure.
- Collaborating with teams to design and deploy cloud architectures aligned with business needs.
- Providing solutions for clients by designing, deploying, and managing Azure IaaS environments tailored to their specific needs.

Education

Galgotias College of Engineering and Technology   August 2020 to May 2023

Information Technology   Bachelor of Technology - BTech

Goverment Polytechnic Bahraich   2017 – 2020

3 years   Diploma

Profiles

Skills

Web Technologies

Advanced

HTML5, JavaScript, Python, TypeScript, Reactjs

Web Frameworks

Intermediate

React.js, Nextjs, Nodejs

Database

MongoDB, PostgreSQL, Redis, Pinecone, SurrealDB

Tools

Webpack, Git, Docker, Vite, Github, Github Actions

Cloud Technology

IaaS, Networking, Storage, Virtual Machine, Azure AD

Certifications	**Microsoft Certified: Azure Fundamentals**	May, 2025

Microsoft

🔗 https://learn.microsoft.com/api/credentials/share/en-in/innovatorved/6511623ED859592E?sharingId

Demonstrated foundational knowledge of cloud services and how they are provided with Microsoft Azure. Covered core concepts such as cloud computing, Azure services, pricing, SLAs, and governance.

Microsoft Certified: Azure Administrator Associate   6 April 202

Microsoft

🔗 https://learn.microsoft.com/en-in/users/innovatorved/credentials/6c94bf7cd6e82766

Skills measured:

- Manage Azure identities and governance
- Implement and manage storage
- Deploy and manage Azure compute resources
- Implement and manage virtual networking
- Monitor and maintain Azure resources

Associate Cloud Engineer Certification   October 23, 2024

Google Cloud

🔗 https://www.credly.com/badges/34a38859-04f5-4548-a543-e871e740db36/

Cloud Architecture, Cloud Computing, Cloud Security, Cloud Storage, Compute Engine, Google Cloud Platform (GCP), Identity And Access Management (IAM), Infrastructure as Code (IaC), Networking, Pub/sub, SQL

GitHub Foundations   November 29, 2024

GitHub

🔗 https://www.credly.com/badges/616b1e3c-7b47-464b-ad2f-5d9d04d07985/public_url

GitHub Foundations Certified Professional with validated expertise in core GitHub technologies and software development practices. Skilled in repository management, collaborative workflows, continuous integration, and DevOps principles. Demonstrated proficiency in GitHub basics including version control, project management, and modern development techniques.

ReactJS: Zero to Hero   Aug 2024

QA Ltd

🔗 https://certificates.platform.qa.com/4c2ab58979101bc6a8e277c746325c2c35702052.pdf

Completed an in-depth course covering fundamental to advanced React concepts including components, props, state management, hooks, routing, and performance optimization. Gained hands-on experience in building dynamic and responsive web applications.

Projects

Autoapplys.com

Work as a Freelancer fullStack developer

🔗 https://autoapplys.com/

AutoApplys is a web-based application designed to automate and streamline the job application process. As a Full Stack Developer, I led the development of this project, focusing on both the frontend and backend components. The platform allows users to create job profiles, automate resume submissions, and track applications, significantly reducing manual effort and time.

React.js, Nextjs, Mongodb, Prisma, Typescript, JavaScript

whisper.api

An open-source, speech-to-text API powered by OpenAI's Whisper model for easy integration into any app. ⭐ 800+

🔗 https://github.com/innovatorved/whisper.api

Whisper API is a speech-to-text web service built to convert audio input into transcribed text using OpenAI's Whisper model. This project provides an easy-to-use RESTful API that can be integrated into applications for real-time transcription. As the lead developer, I developed this API to handle audio files, process them through Whisper for accurate transcription, and return the transcribed text for further use.ve analytics dashboard for a SaaS application, enhancing data visualization for clients.
